Summary

A newly minted Full Stack Developer with an unconventional background. Coming from an Ecology and Mechanics education, and is now enthusiastically developing web applications.

- Passionate for web development. Self-motivated, adept at problem-solving, and at prioritizing communication to find solutions.
- Maintain flexibility while managing long-term and short-term goals. Perform well under pressure and thrive in fast-paced and demanding environments.

Technical Skills

- 1000+ hours programming
- HTML, JavaScript, Node.js
- React.js, functional components, hooks, state, useEffect

- Test-Driven Development
- Design elements with Bootstrap & CSS
- CMS platforms, WordPress, Orchard

Projects

PARO – JavaScript, Spotify & Discogs APIs | GitHub • Live
- A multipage application with in-app streaming through Spotify's API
- Discoveries are passed to Discord API to search for physical versions

FindWax – React Native, Expo, Yelp Fusion API | GitHub • Under Construction
- A simple and clean mobile application to make finding record shops in new cities a breeze
- Geolocates user and dynamically renders custom icons on in-app map at nearby shop locations

Experience

Developer Intern, NSBE Pro-PDX   **March 2021 – May 2021**
Portland, OR
Improved the interface and SEO of the NSBE Pro-PDX website through collaboration with the NSBE board members and pair-programming with my fellow intern.

Web Developer, GiftRibbn   **March 2021 – June 2021**
Portland, OR
Gained in-depth, hands-on experience with React.js and functional components through mentorship while developing numerous responsive and reusable components for the GiftRibbn Partner portal Front-End.

Web Developer, EnviroIssues   **June 2021 – Current**
Portland, OR
Help community engagement initiatives reach a broader audience by building responsive and accessible web apps tailored to each initiative. Ensure consistent access to sites with Azure dev ops. Work in tandem with project teams to deliver high quality web apps to clients. Handle 4-6 projects/week while prioritizing timely submission of deliverables.

Education

Epicodus – Full-stack Web Development – C#/.NET & React
- Simulates a real-world Agile development environment. Experience working in development teams and pair/mob programming.

Western Washington University – BS Environmental Science – Marine Sciences
